

# XTREME Fixed-Knot Fence for Cattle

Fence made of high tensile wires with XTREME coating for greater strength and durability than any other perimeter fence, with fixed knot braided wires and independent tension on each horizontal wire.

## USES

- Perimeter and interior fences
- Ideal for cattle
- Protection of rural land
- Delimitation of roads

## CHARACTERISTICS

- High tensile wires
- Narrow openings at the bottom, wider at the top
- Maximum power against rust and corrosion thanks to XTREME coating
- Tension curve that absorbs impacts and temperature changes

## ADVANTAGES

- More economical and safer than 5-strand barbed wire fencing
- Minimal deformation due to livestock charging or leaning on the fence
- Minimal maintenance
- Post spacing up to 8m, saving on materials and labor.

## XTREME FIXED KNOT FENCE FOR CATTLE

Code	Height	Opening	Design	Length	# of longitudinal wires	Coating
	m	cm	inch	m		Advanced
19720	1.24	15.24	6"	100	9	XTREME
17070	1.24	30.48	12"	100	9	XTREME
17071	1.24	60.96	24"	100	9	XTREME
17081	1.52	15.24	6"	100	11	XTREME
61722	1.52	30.48	12"	100	11	XTREME
61723	1.52	60.96	24"	100	11	XTREME

+ Valid only on Fixed Knot Fence with XTREME coating

## MANUFACTURING STANDARDS ASTM 116

For more information about Fixed Knot Fence in USA, visit [www.rangemasterfence.com](http://www.rangemasterfence.com) and/or [www.staytuff.com](http://www.staytuff.com)

## FENCE SPECIFICATIONS

Upper/lower selvage wire gauge (edge wire)	12
Inner wire gauge (linear and cross wire)	12.5
Tensile strength longitudinal wires	185 - 210 ksi
Tensile strength cross wires	130 - 145 ksi

## SALINE CHAMBER TEST

XTREME coating	At least 750 hrs. (up to 5% rust appearance)
